Phase 2 Demonstration

- Each group will have 12 minutes for the showcase.
- It is strongly recommended the creation of a script with all the commands to execute.

Steps

1. Clone the group repo to a new folder
2. Checkout the phase 2 tag (`0.2.*` tag)
3. Use gradle to clean and build the project
4. Use gradle to clean and build the project again
5. Run `OPTIONS` command directly from the console (not from inside the application nor from the IDE). Ensure the application ends after showing the available commands
6. List cinemas directly from the console. Ensure the application ends after showing an empty list
7. Start the application without any parameters and execute the following commands from inside the application
8. Create two movies: War Games (114 minutes - 1983) and The Matrix (123 minutes - 1999)
9. Create two cinemas NOS (Porto) and CinemaCity (Lisboa)
10. List all cinemas in `text/plain`
11. Create one theather in each cinema with 2 available seats
12. Show the details of one cinema in `application/json`, with the output sent to a file. Show file contents
13. List all cinemas, using each one of the following formats:
    - `text/plain` - output directly to the console
    - `text/html` - output to a file and view it with a browser
    - `application/json` - output to a file
14. Create one session in NOS cinema, in 8-5-2018 at 15:00 with the movie War Games
15. Create another session in NOS cinema in 9-5-2018 at 16:00 with the movie The Matrix
16. Try to add another session that overlaps one of the previous
17. Create two tickets for War Games session
18. Try to add a third ticket
19. List all tickets for War Games session, using `text/html` with the output sent to a file
20. List all sessions in text/plain in cinema NOS for current day
21. List all sessions in text/plain in cinema NOS for 9-5-2018
22. List all sessions in text/plain for movie War Games in city Porto in 8-5-2018
23. Delete the two created tickets
24. List all tickets for War Games session
25. Exit the application
